

SECURITIES AND EXCHANGE COMMISSION

WASHINGTON, D.C. 20549

FORM 10-Q

QUARTERLY REPORT UNDER SECTION 13 OR 15(d) OF THE
SECURITIES EXCHANGE ACT OF 1934

For The Quarter Ended: December 31, 2003

Commission File Number 0-19672

American Superconductor Corporation

(Exact name of registrant as specified in its charter)

Delaware
(State or other jurisdiction of
organization or incorporation)

04-2959321
(I.R.S. Employer
Identification Number)

Two Technology Drive
Westborough, Massachusetts 01581
(Address of principal executive offices, including zip code)

(508) 836-4200
(Registrant's telephone number, including area code)

Indicate by check mark whether the registrant (1) has filed all reports to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days.

YES NO

Indicate by checkmark whether the registrant is an accelerated filer (as defined in Rule 12b-2 of the Exchange Act).

YES NO

Indicate the number of shares outstanding of each of the issuer's classes of common stock, as of the latest practicable date.

Common Stock, par value \$.01 per share

27,398,572

Class

Outstanding as of February 10, 2004

The accompanying notes are an integral part of the consolidated financial statements.

AMERICAN SUPERCONDUCTOR CORPORATION
NOTES TO INTERIM CONSOLIDATED FINANCIAL STATEMENTS

1. Nature of the Business:

American Superconductor Corporation (the "Company" or "AMSC") was formed on April 9, 1987. The Company is focused on developing, manufacturing and selling products using two core technologies: high temperature superconductor ("HTS") wires and power electronic converters for electric power applications. The Company also assembles superconductor wires and power electronic converters into fully-integrated products, such as HTS ship propulsion motors and dynamic reactive compensation systems, which the Company sells or plans to sell to end users. The Company operates in three business segments—AMSC Wires, SuperMachines and Power Electronic Systems.

The Company has generated operating losses since its inception in 1987 and expects to continue incurring losses until at least the end of fiscal 2005. Operating losses for the fiscal years ended March 31, 2003, 2002 and 2001 have contributed to net cash used by operating activities of \$39,604,957, \$26,456,387 and \$26,424,059, respectively, for these periods. For the nine months ended December 31, 2003, net cash used by operating activities was \$12,884,057.

In July 2003, the Company implemented reductions in its operating and capital budgets for fiscal 2004, primarily through the elimination of 34 positions, including a reduction in force of 23 employees, or 8% of its workforce. Cuts were also made in controllable expenses. In connection with the July 2003 reduction in force, the Company incurred approximately \$191,000 of severance and related costs, all of which were paid by the end of the third quarter of fiscal 2004 and which are reported under selling, general, and administrative ("SG&A") expenses.

The Company had cash, cash equivalents, and long-term marketable securities of \$56,898,765 as of December 31, 2003. To supplement the Company's anticipated cash needs for operations, as well as its investment in the second generation (2G) wire development program, the Company issued 5,721,250 shares of its common stock in a public equity offering in October 2003 that raised \$51,147,975 after deducting underwriting commissions and discounts. See Note 12, Stockholders' Equity, for further details regarding this transaction.

The Company currently derives a portion of its revenue from research and development contracts. The Company recorded contract revenue related to research and development contracts of \$148,917 and \$116,163 for the three months ended December 31, 2003 and 2002, respectively. For the nine months ended December 31, 2003 and 2002, contract revenue was \$702,363 and \$405,540, respectively. In addition, the Company recorded prototype development contract revenue on U.S. Navy and other contracts of \$7,527,457 and \$1,540,552, which are included under "Revenues – Product sales and prototype development contracts," in the three months ended December 31, 2003 and 2002, respectively. For the nine months ended December 31, 2003 and 2002, prototype development contract revenue on U.S. Navy and other contracts was \$19,721,106 and \$5,856,893, respectively.

Costs of revenue include research and development (“R&D”) and SG&A expenses that are incurred in the performance of these development contracts.

R&D and SG&A expenses included as costs of revenue for these development contracts were as follows:

| | Three Months Ended December 31, | | Nine months Ended December 31, | |
|---------------|------------------------------------|-------------|-----------------------------------|-------------|
| | 2003 | 2002 | 2003 | 2002 |
| | (Unaudited) | | (Unaudited) | |
| R&D expenses | \$6,357,707 | \$1,996,274 | \$17,797,051 | \$6,526,009 |
| SG&A expenses | \$2,157,494 | \$297,473 | \$5,284,345 | \$949,009 |

2. Basis of Presentation:

The accompanying consolidated financial statements have been prepared in accordance with generally accepted accounting principles. The unaudited consolidated financial statements of the Company presented herein have been prepared in accordance with the SEC’s instructions to Form 10-Q and as such do not include all of the information and note disclosures included in annual financial statements prepared in accordance with generally accepted accounting principles. Certain information and footnote disclosure normally included in the Company’s annual consolidated financial statements have been condensed or omitted. The interim consolidated financial statements, in the opinion of management, reflect all adjustments (consisting of normal recurring accruals) necessary for a fair presentation of the results for the interim periods ended December 31, 2003 and 2002 and the financial position at December 31, 2003.

The results of operations for the interim periods are not necessarily indicative of the results of operations to be expected for the fiscal year. The Company suggests that these interim consolidated financial statements be read in conjunction with the audited consolidated financial statements for the fiscal year ended March 31, 2003 which are contained in the Company’s Annual Report on Form 10-K covering the fiscal year ended March 31, 2003.

There has been no material change to the Company’s significant accounting policies from those disclosed in the Company’s Annual Report on Form 10-K.

3. Stock-Based Compensation Plans and Pro Forma Stock-Based Compensation Expense

The Company applies Accounting Principles Board Opinion (“APB”) No. 25, “Accounting for Stock Issued to Employees,” and related interpretations in accounting for its stock-based compensation plans. Accordingly, no accounting recognition is given to stock options granted at fair market value until they are exercised. Upon exercise, net proceeds, including tax benefits realized, are credited to stockholders’ equity.

In October 1995, the FASB issued SFAS No. 123, “Accounting for Stock-Based Compensation,” which sets forth a fair-value-based method of recognizing stock-based compensation expense. As permitted by SFAS No. 123, the Company has elected to continue to apply APB No. 25 to account for its stock-based compensation plans.

5. Accounts Receivable:

Accounts receivable at December 31, 2003 and March 31, 2003 consisted of the following:

| | <u>December 31,</u> 2003 | <u>March 31,</u> 2003 |
|---------------------------------------|-----------------------------|--------------------------|
| Accounts Receivable (billed) | \$2,258,399 | \$ 4,828,214 |
| Accounts Receivable (unbilled) | 5,016,542 | 3,275,278 |
| Less: Allowance for Doubtful Accounts | (26,388) | (2,657,485) |
| Accounts Receivable, net | <u>\$7,248,553</u> | <u>\$ 5,446,007</u> |

6. Inventories:

Inventories at December 31, 2003 and March 31, 2003 consisted of the following:

| | <u>December 31,</u> 2003 | <u>March 31,</u> 2003 |
|------------------|-----------------------------|--------------------------|
| Raw materials | \$ 719,268 | \$1,217,033 |
| Work-in-progress | 2,243,987 | 2,250,321 |
| Finished goods | 512,865 | 1,650,432 |
| Inventory | <u>\$3,476,120</u> | <u>\$ 5,117,786</u> |

7. Long-term Inventory and Deferred Revenue:

Long-term inventory and long-term deferred revenue decreased from \$3,250,000 as of September 30, 2003 to \$0 as of December 31, 2003 due to the unconditional sale of six distributed superconducting magnetic energy storage ("D-SMES") units to American Transmission Company ("ATC") in December 2003. These six D-SMES units were originally delivered in fiscal 2001 to another one of the Company's customers, Wisconsin Public Service Corporation ("WPS"), for a total purchase price of \$3,787,000. As the sale of these units to WPS was originally subject to certain return and buyback provisions that expired from 2002 to 2009, the Company deferred recognition of the revenue related to the original sale until the applicable buyback provisions lapsed. The buyback provisions, which were subject to a minimum 6-month written notice requirement, began to lapse in the quarter ended December 31, 2002, until which time WPS had the right to return all the units for the full purchase price of \$3,787,000. The Company recorded \$537,000 of revenue and an equal amount of cost of revenue in the quarter ended December 31, 2002, as the buyback price was reduced from \$3,787,000 to \$3,250,000. In December 2003, WPS exercised its buyback provision for the remaining \$3,250,000 price as part of an agreement whereby ATC unconditionally purchased the six D-SMES units. ATC's purchase of the D-SMES units was a follow-up to its purchase of substantially all of the transmission assets of WPS in January 2001 and a lengthy performance evaluation of the units. As a result, the Company recorded \$3,250,000 of revenue and an equal amount of cost of revenue on its consolidated statement of operations for the quarter ended December 31, 2003. The Company also recorded a

\$3,250,000 reduction in long-term inventory and long-term deferred revenue on its consolidated balance sheet as of December 31, 2003.

8. Accounts Payable and Accrued Expenses

Accounts payable and accrued expenses at December 31, 2003 and March 31, 2003 consisted of the following:

| | <u>December 31, 2003</u> | <u>March 31, 2003</u> |
|---------------------------------------|------------------------------|-----------------------------|
| Accounts payable | \$ 8,120,946 | \$ 3,721,307 |
| Accrued employee stock purchase plan | 105,355 | 199,567 |
| Accrued expenses | 4,491,004 | 5,184,644 |
| Accrued vacation | 656,038 | 668,356 |
| | <u> </u> | <u> </u> |
| Accounts payable and accrued expenses | <u>\$ 13,373,343</u> | <u>\$ 9,773,874</u> |

9. Commitments and Contingencies

Under Delaware law, the Company is required to indemnify its officers and directors for liabilities incurred under certain circumstances. The term of the indemnification period is for the officer's or director's lifetime. The maximum potential amount of future payments the Company could be required to make is unlimited; however, the Company has a Director and Officer insurance policy that limits its indemnification exposure and enables it to recover a portion of any future amounts paid. As a result of its insurance policy coverage, the Company believes its indemnification exposure is minimal. These indemnification obligations were grandfathered under the provisions of FIN No. 45 as they were in effect prior to March 31, 2003. Accordingly, the Company has no liabilities recorded under FIN No. 45 as of December 31, 2003.

The Company received notice on November 5, 2003 of a lawsuit filed against it by TM Capital Corp., a past financial advisor to the Company, under which TM Capital claims to be entitled to cash and equity compensation with respect to the Company's October 2003 public equity offering. Specifically, TM Capital is requesting a cash payment in excess of \$1,600,000 and warrants to purchase over 170,000 shares of the Company's common stock at an exercise price of \$9.50 per share. The Company filed an answer to this lawsuit, denying TM Capital's claims for damages and other relief and asserting several counterclaims against TM Capital, including breach of contract, gross negligence and breach of fiduciary duty. The lawsuit is currently in the early stages of discovery. As the Company believes it has meritorious defenses to this lawsuit and the Company cannot at this time conclude that potential losses associated with this litigation are probable based on SFAS No. 5, "Accounting for Contingencies", the Company has not recorded any liability on its balance sheet as of December 31, 2003 nor any expense to its Statement of Operations.

10. Cost-Sharing Arrangements:

The Company has entered into several cost-sharing arrangements with various agencies of the United States government. Funds paid to the Company under these agreements are not reported as revenues but are used to directly offset the Company's research and development and selling,

general and administrative expenses, and to purchase capital equipment. The Company recorded costs and funding under these agreements of \$744,921 and \$171,068 for the three months ended December 31, 2003 and 2002, respectively. For the nine months ended December 31, 2003 and 2002, government cost sharing funding was \$1,504,353 and \$428,036, respectively. At December 31, 2003, total funding received from inception to date under these agreements was \$15,682,000. Future funding expected to be received over the next 12 months under the existing agreements is approximately \$1,961,000, subject to continued future funding allocations.

11. Business Segment Information:

The Company has three reportable business segments—AMSC Wires, SuperMachines, and Power Electronic Systems.

The AMSC Wires business segment develops, manufactures and sells HTS wire. The focus of this segment's current development, manufacturing and sales efforts is on HTS wire for power transmission cables, motors, generators, synchronous condensers and specialty electromagnets.

The SuperMachines business segment develops and commercializes electric motors, generators, and synchronous condensers based on HTS wire. Its primary focus for motors and generators is on ship propulsion.

The Power Electronic Systems business segment develops and sells power electronic converters and designs, manufactures and sells integrated systems based on those converters for power quality and reliability solutions and for wind farm applications.

The operating results for the three business segments are as follows:

| | Three Months Ended December 31, | | Nine Months Ended December 31, | |
|--------------------------------|------------------------------------|------------------------|-----------------------------------|------------------------|
| | 2003 | 2002 | 2003 | 2002 |
| Revenues | | | | |
| AMSC Wires | \$ 1,443,955 | \$ 480,759 | \$ 4,902,413 | \$ 1,072,746 |
| SuperMachines | 7,446,457 | 1,090,552 | 19,404,106 | 4,230,696 |
| Power Electronic Systems | 3,411,965 | 1,180,182 | 5,366,518 | 4,787,579 |
| Total | \$ 12,302,377 | \$ 2,751,493 | \$ 29,673,037 | \$ 10,091,021 |
| | | | | |
| | Three Months Ended December 31, | | Nine Months Ended December 31, | |
| | 2003 | 2002 | 2003 | 2002 |
| Operating income (loss) | | | | |
| AMSC Wires | \$ (4,422,034) | \$ (7,603,612) | \$ (15,457,417) | \$ (21,288,898) |
| SuperMachines | 449,341 | (2,244,990) | 959,502 | (5,957,990) |
| Power Electronic Systems | (2,291,570) | (2,638,975) | (5,570,460) | (6,127,768) |
| Unallocated corporate expense | (341,537) | (317,501) | (968,643) | (1,112,338) |
| Total | \$ (6,605,800) | \$ (12,805,078) | \$ (21,037,018) | \$ (34,486,994) |

The assets for the three business segments (plus Corporate Cash) are as follows:

| | For the period ended | |
|--|-----------------------|-----------------------|
| | December 31, 2003 | March 31, 2003 |
| Assets | | |
| AMSC Wires | \$ 63,361,350 | \$ 66,393,042 |
| SuperMachines | 6,671,724 | 4,992,328 |
| Power Electronic Systems | 6,127,038 | 10,544,397 |
| Corporate cash and marketable securities | 56,898,765 | 20,048,872 |
| Total | <u>\$ 133,058,877</u> | <u>\$ 101,978,639</u> |

The accounting policies of the business segments are the same as those for the consolidated Company, except that certain corporate expenses which the Company does not believe are specifically attributable or allocable to any of the three business segments have been excluded from the segment operating income (loss).

12. Stockholders' Equity:

In October 2003, the Company completed a public offering of 5,721,250 shares of its common stock at \$9.50 per share. Net proceeds from the offering (after deducting underwriting discounts and commissions, but before deducting offering expenses) were \$51,147,975. Net proceeds from the offering are to be used primarily for working capital and general corporate purposes, including the scale-up of pilot manufacturing for 2G HTS wire.

13. Abandoned Debt Financing:

Fees – abandoned debt financing of \$19,167 for the three months ended December 31, 2003 and \$1,375,101 for the nine months ended December 31, 2003 represented various fees and expenses incurred in connection with the Company's previously-announced debt financing transaction that the Company decided not to pursue in August 2003 in favor of a public equity offering, which the Company completed in October 2003. None of these costs are related to the lawsuit filed against the Company in November 2003 by TM Capital Corp. (see Note 9 – Commitments and Contingencies).

14. New Accounting Pronouncements:

In January 2003, the FASB issued FASB Interpretation No. 46 (FIN 46), "Consolidation of Variable Interest Entities." In general, a variable interest entity is a corporation, partnership, trust or any other legal structure used for business purposes that either (a) does not have equity investors with voting rights or (b) has equity investors that do not provide sufficient financial resources for the entity to support its activities. A variable interest entity often holds financial assets, including loans or receivables, real estate or other property. Variable interest entities have been commonly referred to as special-purpose entities or off-balance sheet structures. This Interpretation requires a variable interest entity to be consolidated by a company if that company is subject to a majority of the risk of loss from the variable interest entity's activities or entitled to receive a majority of the entity's residual returns or both. In July 2003, the FASB added a

limited-scope project to its agenda to modify FIN 46. In December 2003, the FASB released a revised version of FIN 46 (referred to as FIN 46R) clarifying certain aspects of FIN 46 and providing certain entities with exemptions from the requirements of FIN 46. FIN 46R requires the application of either FIN 46 or FIN 46R to all Special Purpose Entities (“SPEs”) created prior to February 1, 2003 at the end of the first interim or annual reporting period ending after December 15, 2003. All entities created after January 31, 2003 were already required to be analyzed under FIN 46, and they must continue to do so, unless FIN 46R is adopted early. FIN 46R will be applicable to all non-SPEs created prior to February 1, 2003 at the end of the first interim or annual reporting period ending after March 15, 2004. The Company does not expect that this Interpretation will have a material impact on its financial position or results of operations.

In May 2003, the Financial Accounting Standards Board issued Statement of Financial Accounting Standards No. 150, “Accounting for Certain Financial Instruments with Characteristics of both Liabilities and Equity” (SFAS No. 150). This accounting standard establishes standards for classifying and measuring certain financial instruments with characteristics of both liabilities and equity. It requires that certain financial instruments that were previously classified as equity now be classified as a liability. This accounting standard is effective for financial instruments entered into or modified after May 31, 2003, and otherwise at the beginning of the first interim period beginning after June 15, 2003. The Company does not expect the adoption of SFAS No. 150 to have an impact on its financial position or results of operations.

Item 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Overview

American Superconductor Corporation was founded in 1987. We are focused on developing, manufacturing and selling products using two core technologies: high temperature superconductor ("HTS") wires and power electronic converters for electric power applications. We also assemble superconductor wires and power electronic converters into fully-integrated products, such as HTS ship propulsion motors and dynamic reactive compensation systems, which we sell or plan to sell to end users.

We focus on several key financial metrics in evaluating our financial condition and operating performance, most importantly actual revenues compared to prior-period revenue performance and current-year revenue plans, operating profit or loss performance by business segment, operating costs and expenses by business segment, cash flow, the actual and potential level of new customer orders, and backlog.

Critical Accounting Policies

The preparation of consolidated financial statements requires that we make estimates and judgments that affect the reported amounts of assets, liabilities, revenue and expenses, and related disclosure of contingent assets and liabilities. We base our estimates on historical experience and various other assumptions that are believed to be reasonable under the circumstances, the results of which form the basis for making judgments about the carrying values of assets and liabilities that are not readily apparent from other sources. Actual results may differ under different assumptions or conditions.

Our accounting policies that involve the most significant judgments and estimates are as follows:

- Revenue recognition;
- Long-term inventory and deferred revenue;
- Allowance for doubtful accounts;
- Long-lived assets;
- Inventory accounting;
- Deferred tax assets;
- Goodwill; and
- Acquisition accounting.

Revenue recognition. For certain arrangements, such as contracts to perform research and development and prototype development contracts, we record revenues using the percentage of completion method, measured by the relationship of costs incurred to total estimated contract costs. We follow this method since reasonably dependable estimates of the revenue and costs applicable to various stages of a contract can be made. Since many contracts extend over a long period of time, revisions in cost and funding estimates during the progress of work have the effect of adjusting earnings applicable to performance in prior periods in the current period. Recognized revenues and profit or loss are subject to revisions as the contract progresses to completion. Revisions in profit or loss estimates are charged to income in the period in which the facts that give rise to the revision become known. Some of our contracts contain incentive provisions, based upon performance in relation to established targets, which are recognized in the contract estimates when deemed realizable.

We recognize revenue from product sales upon customer acceptance, which can occur at the time of delivery, installation, or post-installation, where applicable, provided persuasive evidence of an arrangement exists, delivery has occurred, the sales price is fixed or determinable and the collectibility is reasonably assured, or for some programs, on the percentage of completion method of accounting. When other significant obligations remain after products are delivered, revenue is recognized only after such obligations (including buyback provisions) are fulfilled. Customer deposits received in advance of revenue recognition are recorded as deferred revenue until the related sales are recognized. Deferred revenue represents the amount billed to or collected from commercial and government customers on contracts which permit billings to occur in advance of contract performance/revenue recognition.

Long-term inventory and deferred revenue. Long-term inventory and long-term deferred revenue decreased from \$3,250,000 as of September 30, 2003 to \$0 as of December 31, 2003 due to the unconditional sale of six distributed superconducting magnetic energy storage (“D-SMES”) units to American Transmission Company (“ATC”) in December 2003. These six D-SMES units were originally delivered in fiscal 2001 to another one of our customers, Wisconsin Public Service Corporation (“WPS”), for a total purchase price of \$3,787,000. As the sale of these units to WPS was originally subject to certain return and buyback provisions that expired from 2002 to 2009, we deferred recognition of the revenue related to the original sale until the applicable buyback provisions lapsed. The buyback provisions, which were subject to a minimum 6-month written notice requirement, began to lapse in the quarter ended December 31, 2002, until which time WPS had the right to return all the units for the full purchase price of \$3,787,000. We recorded \$537,000 of revenue and an equal amount of cost of revenue in the quarter ended December 31, 2002, as the buyback price was reduced from \$3,787,000 to \$3,250,000. In December 2003, WPS exercised its buyback provision for the remaining \$3,250,000 price as part of an agreement whereby ATC unconditionally purchased the six D-SMES units. ATC’s purchase of the D-SMES units was a follow-up to its purchase of substantially all of the transmission assets of WPS in January 2001 and a lengthy performance evaluation of the units. As a result, we recorded \$3,250,000 of revenue and an equal amount of cost of revenue on our consolidated statement of operations for the quarter ended December 31, 2003. We also recorded a \$3,250,000

reduction in long-term inventory and long-term deferred revenue on our consolidated balance sheet as of December 31, 2003.

Allowance for doubtful accounts. If the financial condition of our customers were to deteriorate, resulting in an impairment of their ability to make payments, additional provisions for bad debt allowances may be required.

Long-Lived Assets. We periodically evaluate our long-lived assets for potential impairment under Statement of Financial Accounting Standards (SFAS) No. 144, "Accounting for the Impairment or Disposal of Long-Lived Assets." We perform these evaluations whenever events or circumstances suggest that the carrying amount of an asset or group of assets is not recoverable. Our judgments regarding the existence of impairment indicators are based on market and operational performance. Indicators of potential impairment include:

- a significant change in the manner in which an asset is used;
- a significant decrease in the market value of an asset;
- a significant adverse change in its business or the industry in which it is sold;
- a current period operating cash flow loss combined with a history of operating or cash flow losses or a projection or forecast that demonstrates continuing losses associated with the asset; and
- significant advances in our technologies that require changes in our manufacturing process.

If we believe an indicator of potential impairment exists, we test to determine whether impairment recognition criteria in SFAS No. 144 have been met. To analyze a potential impairment, we project undiscounted future cash flows over the remaining life of the asset or the primary asset in the asset group. If these projected cash flows are less than the carrying amount, an impairment loss is recognized based on the fair value of the asset or asset group less any costs of disposition. Evaluating the impairment requires judgment by our management to estimate future operating results and cash flows. If different estimates were used, the amount and timing of asset impairments could be affected. We charge impairments of the long-lived assets to operations if our evaluations indicate that the carrying values of these assets are not recoverable.

In the fourth quarter of fiscal 2003 ended March 31, 2003, we recorded a \$39,231,000 impairment charge to write down our first-generation (1G) asset group, primarily comprised of the Devens manufacturing facility and capital equipment, to an estimated fair value.

Inventory accounting. We write down inventory for estimated obsolescence or unmarketable inventory in an amount equal to the difference between the cost of the inventory and the estimated realizable value based upon assumptions of future demand and market conditions. If actual market conditions are less favorable than those projected, additional inventory write-downs may be required.

Deferred tax assets. We have recorded a full valuation allowance to reduce our deferred tax assets to the amount that is more likely than not to be realized. While we consider future taxable income and tax planning strategies in assessing the need for the valuation allowance, if management were to determine that we would be able to realize deferred tax assets in the future in excess of the net recorded amount, an adjustment to the deferred tax asset would increase income in the period such determination was made. Likewise, should we determine that we would not be able to realize all or part of our net deferred tax assets in the future, an adjustment to the deferred tax asset would decrease income in the period such determination was made.

Goodwill. Goodwill represents the excess of cost over net assets of acquired businesses that are consolidated. Pursuant to SFAS No. 142 “Goodwill and Other Intangible Assets,” goodwill is not amortized. In lieu of amortization, we perform an impairment review of our goodwill at least annually or when events and changes in circumstances indicate the need for such a detailed impairment loss analysis, as prescribed by SFAS 142. To date, no triggering event has occurred requiring us to perform an interim goodwill impairment test. A future impairment test could determine that goodwill is impaired, which would result in a charge to earnings.

Acquisition accounting. We account for our acquisitions under the purchase method of accounting pursuant to SFAS No. 141 “Business Combinations.” In June 2000, we acquired in a business combination substantially all of the assets of Integrated Electronics, LLC (“IE”), as well as IE’s employees and facility lease. The IE acquisition was accounted for under the purchase method of accounting. Goodwill of \$1,329,282 represented the excess of the purchase price of \$1,833,125 over the fair value of the acquired assets of \$503,843 at June 1, 2000. Goodwill was \$1,107,735 at December 31, 2003 and March 31, 2003.

Results of Operations

The Company has three reportable business segments—AMSC Wires, SuperMachines, and Power Electronic Systems.

The AMSC Wires business segment develops, manufactures and sells HTS wire. The focus of this segment’s current development, manufacturing and sales efforts is on HTS wire for power transmission cables, motors, generators, synchronous condensers and specialty electromagnets.

The SuperMachines business segment develops and commercializes electric motors, generators, and synchronous condensers based on HTS wire. Its primary focus for motors and generators is on ship propulsion.

The Power Electronic Systems business segment develops and sells power electronic converters and designs, manufactures and sells integrated systems based on those converters for power quality and reliability solutions and for wind farm applications.

Revenues

Total revenues during the three months ended December 31, 2003 were \$12,302,000, a 347% increase compared to the \$2,751,000 of revenue recorded for the same period a year earlier. For

the nine months ended December 31, 2003, revenues were \$29,673,000, a 194% increase over the \$10,091,000 of revenue recorded in the comparable period of the prior year. The increase in consolidated revenues of \$9,551,000 for the three months ended December 31, 2003 and \$19,582,000 for the nine months ended December 31, 2003, compared to the same prior-year periods, was mainly the result of an increase in prototype development contract revenues, primarily relating to work performed on the 36.5 Megawatt (MW) motor program for the U. S. Navy.

| | For the three months ended | | For the nine months ended | |
|--------------------------|----------------------------|---------------------|---------------------------|----------------------|
| | December 31, 2003 | December 31, 2002 | December 31, 2003 | December 31, 2002 |
| Revenues | | | | |
| AMSC Wires | \$ 1,444,000 | \$ 481,000 | \$ 4,902,000 | \$ 1,073,000 |
| SuperMachines | 7,446,000 | 1,090,000 | 19,404,000 | 4,231,000 |
| Power Electronic Systems | 3,412,000 | 1,180,000 | 5,367,000 | 4,787,000 |
| Total | \$ 12,302,000 | \$ 2,751,000 | \$ 29,673,000 | \$ 10,091,000 |

Revenues in our AMSC Wires business unit increased by \$963,000 to \$1,444,000 for the quarter ended December 31, 2003 from \$481,000 for the same period of the prior year. For the nine months ended December 31, 2003, revenues increased by \$3,829,000 to \$4,902,000 from \$1,073,000 for the comparable period of the prior year. The growth in revenues in AMSC Wires in the third quarter and first nine months of fiscal 2004, compared to the prior-year periods, was attributable to two factors. Product sales increased by \$930,000 to \$1,295,000 in the quarter ended December 31, 2003 from \$365,000 in the prior-year quarter, and by \$3,532,000 to \$4,200,000 in the nine months ended December 31, 2003 from \$668,000 in the comparable prior-year period, due to a higher level of 1G wire sales and the continuation of work on a project to install an HTS power cable in the transmission grid of the Long Island Power Authority (LIPA). Contract revenues also grew by \$33,000 to \$149,000 in the quarter ended December 31, 2003 from \$116,000 in the prior-year quarter, and by \$297,000 to \$702,000 in the nine months ended December 31, 2003 from \$405,000 in the comparable prior-year period, due primarily to a higher level of work on several programs focused on 2G wire development, including two Phase II Small Business Innovation Research (SBIR) grants with the Department of Energy and the National Institutes of Health.

Revenues in our SuperMachines business unit increased by \$6,356,000 to \$7,446,000 for the quarter ended December 31, 2003 from \$1,090,000 for the quarter ended December 31, 2002. For the nine months ended December 31, 2003, revenues in SuperMachines were \$19,404,000 compared to \$4,231,000 in the comparable period of the prior year, an increase of \$15,173,000. Over 90% of this business unit's revenues, or \$7,237,000 for the three months ended December 31, 2003 and \$17,740,000 for the nine months ended December 31, 2003, related to our work on

the 36.5 MW motor program, which began in March 2003. The remainder of SuperMachines' revenue for the nine-month period ended December 31, 2003 related to the completion of work on the 5 MW motor, which was delivered to the U.S. Navy in July 2003, work performed on the SuperVAR™ synchronous condenser prototype shipped to the Tennessee Valley Authority in the third quarter of fiscal 2004, and to the commencement of work in November 2003 on a new Navy contract to provide test support to the 5 MW motor. SuperMachines' revenues in the three and nine-month periods ended December 31, 2002 were exclusively related to the 5 MW motor program.

Revenues in the Power Electronic Systems business unit were \$3,412,000 for the quarter ended December 31, 2003, compared to \$1,180,000 for the same period of the prior year, and \$5,367,000 for the nine months ended December 31, 2003, compared to \$4,787,000 for the same period of the prior year. Included in the third quarter of fiscal 2004 was \$3,250,000 of revenues and \$3,250,000 of costs of revenue relating to the sale of six D-SMES units to ATC.

These six D-SMES units were originally delivered in fiscal 2001 to another one of our customers, WPS, for a total purchase price of \$3,787,000. As the sale of these units to WPS was originally subject to certain return and buyback provisions that expired from 2002 to 2009, we deferred recognition of the revenue related to the original sale until the applicable buyback provisions lapsed. The buyback provisions, which were subject to a minimum 6-month written notice requirement, began to lapse in the quarter ended December 31, 2002, until which time WPS had the right to return all the units for the full purchase price of \$3,787,000. We recorded \$537,000 of revenue and an equal amount of cost of revenue in the quarter ended December 31, 2002, as the buyback price was reduced from \$3,787,000 to \$3,250,000. In December 2003, WPS exercised its buyback provision for the remaining \$3,250,000 price as part of an agreement whereby ATC unconditionally purchased the six D-SMES units. ATC's purchase of the D-SMES units was a follow-up to its purchase of substantially all of the transmission assets of WPS in January 2001 and a lengthy performance evaluation of the units. As a result, we recorded \$3,250,000 of revenue and an equal amount of cost of revenue on our consolidated statement of operations for the quarter ended December 31, 2003. The increase in revenues due to the ATC sale was partially offset by \$450,000 and \$1,390,000 reductions in prototype development contract revenues associated with our Power Electronic Building Blocks (PEBB) program with the U.S. Navy in the three and nine month periods ended December 31, 2003, respectively, compared to the same prior-year periods.

For the three months and nine months ended December 31, 2003, we recorded \$745,000 and \$1,504,000, respectively, in funding under four government cost-sharing agreements, two with the U.S. Air Force, and one each with the Department of Commerce and the Department of Energy. For the three months and nine months ended December 31, 2002, we recorded \$171,000 and \$428,000, respectively, of funding under one of the U.S. Air Force agreements and the Department of Commerce agreement. We anticipate that a portion of our funding in the future will continue to come from cost-sharing agreements as we continue to develop joint programs with government agencies. Funding from government cost-sharing agreements is recorded as an offset to research and development and selling, general and administrative expenses, as required by government contract accounting guidelines, rather than as revenues.

Costs and expenses

Total costs and expenses for the quarter ended December 31, 2003 were \$18,908,000, including \$3,250,000 relating to the ATC sale, compared to \$15,557,000 for the same period last year. Total costs and expenses for the nine months ended December 31, 2003 were \$50,710,000 compared to \$44,578,000 for the same period last year.

Costs of revenue – product sales and prototype development contracts increased by \$7,632,000 to \$13,578,000 for the three months ended December 31, 2003, compared to \$5,946,000 for the same period of the prior year. Costs of revenue – product sales and prototype development contracts increased by \$15,764,000 to \$31,810,000 for the nine months ended December 31, 2003, compared to \$16,046,000 for the same period of the prior year. These increases were primarily related to the higher level of prototype development contract revenues with the U.S. Navy in the SuperMachines business unit, and to the ATC sale in the Power Electronic Systems business unit. In connection with the higher level of contract revenues, Costs of revenue – contract revenue increased by \$49,000 to \$142,000, compared to \$93,000 for the same period of the prior year, in the quarter ended December 31, 2003, and by \$233,000 to \$664,000 for the nine months ended December 31, 2003, compared to \$431,000 for the same period of the prior year.

Research and development

Our research and development (“R&D”) expenditures are summarized as follows:

| | Three Months Ended December 31, | | Nine months Ended December 31, | |
|--|------------------------------------|--------------|-----------------------------------|---------------|
| | 2003 | 2002 | 2003 | 2002 |
| R&D expenses per Consolidated Statements of Operations | \$ 3,611,000 | \$ 6,021,000 | \$ 11,586,000 | \$ 17,848,000 |
| R&D expenditures classified as Costs of revenue | 6,358,000 | 1,996,000 | 17,797,000 | 6,526,000 |
| R&D expenditures offset by cost sharing funding | 532,000 | 101,000 | 1,234,000 | 234,000 |
| Pro forma R&D expenses | \$ 10,501,000 | \$ 8,188,000 | \$ 30,617,000 | \$ 24,608,000 |

R&D expenses (exclusive of amounts classified as costs of revenue and amounts offset by cost sharing funding) decreased to \$3,611,000 in the three months ended December 31, 2003 from \$6,021,000 for the same period last year. R&D expenses decreased to \$11,586,000 in the nine months ended December 31, 2003 from \$17,848,000 for the same period last year. These amounts decreased in the three months and nine months ended December 31, 2003 when compared to the same periods of the prior year primarily as a result of a higher percentage of the R&D costs being classified as costs of revenue due to the higher level of funded prototype development contract work in the SuperMachines business unit. Pro forma R&D expenses, which include amounts classified as costs of revenue and amounts offset by cost sharing funding, increased to \$10,501,000 in the three months ended December 31, 2003 from \$8,188,000 for the same period last year. Pro forma R&D expenses increased to \$30,617,000 in the nine months

ended December 31, 2003 from \$24,608,000 for the same period last year. The increase in pro forma R&D spending in the three months and nine months ended December 31, 2003, when compared to the same periods of the prior year, was the result of increases of \$2,575,000 and \$5,680,000, respectively, in material, subcontractor, and temporary labor costs in the SuperMachines business unit and higher subcontract spending on the LIPA program. These increases were partially offset by reduced R&D spending in the AMSC Wires and Power Electronic Systems business units, primarily due to headcount reductions in those two business units over the last year. A portion of the R&D expenditures related to externally funded development contracts has been classified as costs of revenue (rather than as R&D expenses). Additionally, a portion of R&D expenses was offset by cost sharing funding.

Selling, general and administrative

Our selling, general and administrative (“SG&A”) expenditures are summarized as follows:

| | Three Months Ended December 31, | | Nine months Ended December 31, | |
|---|------------------------------------|---------------------|-----------------------------------|----------------------|
| | 2003 | 2002 | 2003 | 2002 |
| SG&A expenses per Consolidated Statements of Operations | \$ 1,578,000 | \$ 3,496,000 | \$ 6,650,000 | \$ 10,252,000 |
| SG&A expenditures classified as Costs of revenue | 2,157,000 | 298,000 | 5,284,000 | 949,000 |
| SG&A expenditures offset by cost sharing funding | 213,000 | 70,000 | 270,000 | 195,000 |
| Pro forma SG&A expenses | \$ 3,948,000 | \$ 3,864,000 | \$ 12,204,000 | \$ 11,396,000 |

SG&A expenses (exclusive of amounts classified as costs of revenue and amounts offset by cost sharing funding) decreased to \$1,578,000 in the three months ended December 31, 2003 from \$3,496,000 for the same period last year. SG&A expenses decreased to \$6,650,000 in the nine months ended December 31, 2003 from \$10,252,000 for the same period last year. These amounts decreased in the three and nine months ended December 31, 2003 when compared to the same period of the prior year primarily as a result of a higher percentage of the SG&A costs being classified as costs of revenue due to the higher level of funded prototype development contract work in the SuperMachines business unit. Pro forma SG&A expenses, which include amounts classified as costs of revenue and amounts offset by cost sharing funding, increased to \$3,948,000 for the three months ended December 31, 2003, compared to \$3,864,000 for the same period last year. Pro forma SG&A expenses increased to \$12,204,000 for the nine months ended December 31, 2003, compared to \$11,396,000 for the same period last year. These increases were primarily the result of higher legal and other professional service fees, as well as a higher percentage of the rent and occupancy costs associated with our Westborough, MA corporate headquarters now being classified as general and administrative expense rather than in costs of revenue – product sales and prototype development contracts and research and development expense. We have completed the relocation of our manufacturing workforce to Devens, MA from Westborough, which is now partially unoccupied. A portion of the SG&A expenditures

related to externally funded development contracts has been classified as costs of revenue (rather than as SG&A expenses). Additionally, a portion of SG&A expenses was offset by cost sharing funding.

We present pro forma R&D and pro forma SG&A expenses, which are non-GAAP financial measures, because we believe this presentation provides useful information on our aggregate R&D and SG&A spending.

Non-operating expenses/Interest income

Interest income was \$82,000 in the three months ended December 31, 2003, compared to \$193,000 in the three months ended December 31, 2002. The decrease in interest income compared to the prior-year quarter was the primarily result of lower average interest rates on our investments. Interest income decreased to \$164,000 in the nine months ended December 31, 2003 from \$820,000 in the same period of the prior year. This decrease in interest income compared to the prior-year period reflects the lower cash balances available for investment, as well as lower interest rates available on our investments.

Fees - abandoned debt financing of \$1,375,000 for the nine months ended December 31, 2003 were primarily incurred in the second quarter of fiscal 2004 and represented various fees and expenses incurred in connection with our previously-announced debt financing transaction that we decided not to pursue in August 2003 in favor of a public equity offering, which we completed in October 2003. None of these costs related to the lawsuit filed against us in November 2003 by TM Capital Corp.

We expect to continue to incur operating losses until at least the end of the fiscal year ending March 31, 2005 as we continue to devote significant financial resources to our research and development activities and commercialization efforts.

Please refer to the "Future Operating Results" section below for a discussion of certain factors that may affect our future results of operations and financial condition.

Liquidity and Capital Resources

At December 31, 2003, we had cash, cash equivalents and long-term marketable securities of \$56,899,000 compared to \$8,818,000 at September 30, 2003 and \$20,049,000 at March 31, 2003. The increase in cash, cash equivalents and long-term marketable securities is the result of an October 2003 public equity offering of 5,721,250 shares of our common stock that generated net proceeds (after deducting underwriting discounts and commissions, but before deducting offering expenses) of \$51,148,000.

For the first nine months of fiscal 2004, our use of cash, excluding the proceeds from the October 2003 public offering, was \$14,298,000. The principal uses of cash during the nine months ended December 31, 2003 were net losses of \$22,211,000, partially offset by depreciation and amortization of \$5,382,000 and higher accounts payable and accrued expenses

of \$3,599,000. Accounts payable and accrued expenses at December 31, 2003 included \$3,250,000 which was paid to WPS in January 2004 in settlement of their buyback option exercise. Cash used in investing activities of \$1,696,000, consisting primarily of \$1,365,000 in capital expenditures, was partially offset by cash provided by financing activities of \$1,226,000 (excluding \$51,148,000 from the public offering) derived primarily from proceeds from the exercise of stock options.

We have generated operating losses since our inception in 1987 and expect to continue incurring losses until at least the end of fiscal 2005. Operating losses for the fiscal years ended March 31, 2003, 2002, and 2001 have contributed to net cash used by operating activities of \$39,605,000, \$26,456,000, and \$26,424,000, respectively, for these periods. For the nine months ended December 31, 2003, net cash used by operating activities was \$12,884,000.

In July 2003, we implemented a plan which called for approximately \$5,000,000 of reductions in our operating and capital budgets for fiscal 2004, primarily through the elimination of 34 positions, including a reduction in force of 23 employees, or 8% of our workforce. Cuts were also made in controllable expenses. Cost savings compared to budget were approximately \$5,000,000 through the end of the third quarter, and we believe we are on track to achieve between \$5,000,000 and \$6,000,000 of cost savings for the full fiscal year.

In October 2003, we completed a public equity offering of 5,721,250 shares of our common stock that generated net proceeds (after deducting underwriting discounts and commissions, but before deducting offering expenses) of \$51,148,000, in order to supplement our anticipated cash needs for operations as well as our investment in the 2G wire development program. Although our cash requirements fluctuate based on a variety of factors, including customer adoption of our products and our research and development efforts to commercialize our products, we believe that with the proceeds from the public stock offering in October 2003, our available cash will be sufficient to fund our working capital, capital expenditures, and other cash requirements for at least the next 12 months.

We have potential funding commitments (excluding amounts included in accounts receivable) of approximately \$75,192,000 to be received after December 31, 2003 from government and commercial customers, compared to \$78,336,000 at March 31, 2003 and \$6,940,000 at December 31, 2002. However, these current funding commitments, including \$63,850,000 on U.S. government contracts, are subject to certain standard cancellation provisions. Additionally, several of our government contracts are being funded incrementally, and as such, are subject to the future authorization and appropriation of government funding on an annual basis. We have a history of successful performance under incrementally-funded contracts with the U.S. government.

Included in our current potential funding commitment amount is \$47,686,000 relating to the U.S. Navy 36.5 MW motor contract, which represents the total base program value (excluding certain potential performance-based incentive fees) of \$66,611,000, less the \$18,925,000 of revenue recognized for the program through December 31, 2003.

Of the current commitment amount of \$75,192,000 as of December 31, 2003, approximately 55% is billable to and potentially collectable from our customers within the next 12 months.

The possibility exists that we may pursue acquisition and joint venture opportunities in the future that may affect liquidity and capital resource requirements.

To date, inflation and foreign exchange have not had a material impact on our financial results.

New Accounting Pronouncements

In January 2003, the FASB issued FASB Interpretation No. 46 (FIN 46), "Consolidation of Variable Interest Entities." In general, a variable interest entity is a corporation, partnership, trust or any other legal structure used for business purposes that either (a) does not have equity investors with voting rights or (b) has equity investors that do not provide sufficient financial resources for the entity to support its activities. A variable interest entity often holds financial assets, including loans or receivables, real estate or other property. Variable interest entities have been commonly referred to as special-purpose entities or off-balance sheet structures. This Interpretation requires a variable interest entity to be consolidated by a company if that company is subject to a majority of the risk of loss from the variable interest entity's activities or entitled to receive a majority of the entity's residual returns or both. In July 2003, the FASB added a limited-scope project to its agenda to modify FIN 46. In December 2003, the FASB released a revised version of FIN 46 (referred to as FIN 46R) clarifying certain aspects of FIN 46 and providing certain entities with exemptions from the requirements of FIN 46. FIN 46R requires the application of either FIN 46 or FIN 46R to all Special Purpose Entities ("SPEs") created prior to February 1, 2003 at the end of the first interim or annual reporting period ending after December 15, 2003. All entities created after January 31, 2003 were already required to be analyzed under FIN 46, and they must continue to do so, unless FIN 46R is adopted early. FIN 46R will be applicable to all non-SPEs created prior to February 1, 2003 at the end of the first interim or annual reporting period ending after March 15, 2004. The Company does not expect that this Interpretation will have an impact on its financial position or results of operations.

In May 2003, the Financial Accounting Standards Board issued Statement of Financial Accounting Standards No. 150, "Accounting for Certain Financial Instruments with Characteristics of both Liabilities and Equity" (SFAS No. 150). This accounting standard establishes standards for classifying and measuring certain financial instruments with characteristics of both liabilities and equity. It requires that certain financial instruments that were previously classified as equity now be classified as a liability. This accounting standard is effective for financial instruments entered into or modified after May 31, 2003, and otherwise at the beginning of the first interim period beginning after June 15, 2003. The Company does not expect the adoption of SFAS No. 150 to have an impact on its financial position or results of operations.

FUTURE OPERATING RESULTS

Various statements included herein, as well as other statements made from time to time by our representatives, which relate to future matters (including but not limited to statements concerning our future commercial success) constitute forward looking statements and are made under the “safe harbor” provisions of the Private Securities Litigation Reform Act of 1995. There are a number of important factors which could cause our actual results of operations and financial condition in the future to vary from that indicated in such forward looking statements. Factors that may cause such differences include, without limitation, the risks, uncertainties and other information set forth below.

We have a history of operating losses, and we expect to continue to incur losses in the future.

We have been principally engaged in research and development activities. We have incurred net losses in each year since our inception. Our net loss for the nine months ended December 31, 2003 was \$22,211,000, and for the fiscal years ended March 31, 2003, March 31, 2002, and March 31, 2001 was \$87,633,000, \$56,985,000, and \$21,676,000, respectively. Our accumulated deficit as of December 31, 2003 was \$295,321,000. We expect to continue to incur operating losses until at least the end of fiscal 2005, and there can be no assurance that we will ever achieve profitability.

We had cash, cash-equivalents and long-term marketable securities totaling \$56,899,000 at December 31, 2003. In October 2003, we completed a public offering of 5,721,250 shares of our common stock that generated net proceeds (after deducting underwriting discounts and commissions, but before deducting offering expenses) of \$51,148,000. With the proceeds from this stock offering in October 2003, we believe our available cash will be sufficient to fund our working capital, capital expenditures, and other cash requirements for at least the next 12 months. However, we may need additional funds sooner than anticipated if our performance deviates significantly from our current business plan, if there are significant changes in competitive or other market factors, or if unforeseen circumstances arise. Such funds may not be available, or may not be available under terms acceptable to us.

There are a number of technological challenges that must be successfully addressed before our superconductor products can gain widespread commercial acceptance, and our inability to address such technological challenges could adversely affect our ability to acquire customers for our products.

Many of our products are in the early stages of commercialization and testing, while others are still under development. We do not believe any company has yet successfully developed and commercialized significant quantities of HTS wire or wire products. There are a number of technological challenges that we must successfully address to complete our development and commercialization efforts. We also believe that several years of further development in the cable and motor industries will be necessary before a substantial number of additional commercial applications for our HTS wire in these industries can be developed and proven. We may also

need to improve the performance and/or reduce the cost of our HTS wire to expand the number of commercial applications for it. We may be unable to meet such technological challenges. Delays in development, as a result of technological challenges or other factors, may result in the introduction or commercial acceptance of our products later than anticipated.

The commercial uses of superconductor products are very limited today, and a widespread commercial market for our products may not develop.

To date, there has been no widespread commercial use of HTS products. Commercial acceptance of low temperature superconductor (LTS) products, other than for medical magnetic resonance imaging and superconductor magnetic energy storage products, has been significantly limited by the cooling requirements of LTS materials. Even if the technological hurdles currently limiting commercial uses of HTS and LTS products are overcome, it is uncertain whether a robust commercial market for those new and unproven products will ever develop. It is possible that the market demands we currently anticipate for our HTS and LTS products will not develop and that superconductor products will never achieve widespread commercial acceptance.

We have limited experience manufacturing our HTS products in commercial quantities, and failure to manufacture our HTS products in commercial quantities at acceptable costs and quality levels could impair our ability to meet customer delivery requirements.

To be financially successful, we will have to manufacture our products in commercial quantities at acceptable costs while also preserving the quality levels we have achieved in manufacturing these products in limited quantities. This presents a number of technological and engineering challenges for us. In particular, we will need to improve the manufacturing yields we are achieving in the early stage of operation of our manufacturing plant located in Devens, MA. We cannot make assurances that we will be successful in developing product designs and manufacturing processes that permit us to manufacture our HTS products in commercial quantities at commercially acceptable costs while preserving quality. In addition, we may incur significant unforeseen expenses in our product design and manufacturing efforts. The failure to manufacture a sufficient quantity of HTS wire at acceptable quality levels could impair our ability to meet customer delivery commitments and adversely affect our revenue and cash flow.

We have limited experience in marketing and selling our products, and our failure to effectively market and sell our products could adversely affect our revenue and cash flow.

To date, we have only limited experience marketing and selling our products, and there are very few people anywhere who have significant experience marketing or selling superconductor products. Once our products are ready for widespread commercial use, we will have to develop a marketing and sales organization that will effectively demonstrate the advantages of our products over both more traditional products and competing superconductor products or other technologies. We may not be successful in our efforts to market this new and unfamiliar technology, and we may not be able to establish an effective sales and distribution organization.

We may decide to enter into arrangements with third parties for the marketing or distribution of our products, including arrangements in which our products, such as HTS wire, are included as a component of a larger product, such as a motor. For example, we have a marketing and sales alliance with GE Industrial Systems giving GE the exclusive right to offer our Distributed-SMES (D-SMES) and D-VAR[®] product lines in the United States and South America to utilities and the right to sell industrial Power Quality-Industrial Voltage Restorers (PQ-IVR[™]) to one of GE's global industrial accounts. We also have a distribution agreement with Bridex Technologies Pte, Ltd., a power system solution integrator and technology company in Singapore, whereby Bridex markets and sells our integrated power electronic systems within Asia Pacific markets. By entering into marketing and sales alliances, the financial benefits to us of commercializing our products are dependent on the efforts of others. We may not be able to enter into marketing or distribution arrangements with third parties on financially acceptable terms, and third parties may not be successful in selling our products or applications incorporating our products.

Our products face intense competition both from superconductor products developed by others and from traditional, non-superconductor products and alternative technologies, which could limit our ability to acquire or retain customers.

As we begin to market and sell our superconductor products, we will face intense competition both from competitors in the superconductor field and from vendors of traditional products and new technologies. There are many companies in the United States, Europe, Japan and China engaged in the development of HTS products, including Sumitomo Electric Industries, Intermagnetics General, European Advanced Superconductors, Trithor, Fujikura, Furukawa Electric, and Innova Superconductor Technology. The superconductor industry is characterized by rapidly changing and advancing technology. Our future success will depend in large part upon our ability to keep pace with advancing HTS and LTS technology and developing industry standards. Our SMES products and integrated power electronic products, such as D-VAR[®], compete with a variety of other products such as dynamic voltage restorers (DVRs), static VAR compensators (SVCs), static compensators (STATCOMS), flywheels, power electronic converters and battery-based power supply systems. Competition for our PowerModules[™] includes products from Ecostar, Inverpower, SatCon, Semikron and Trace. The HTS motor and generator products that we are developing face competition from copper wire-based motors and generators, and from permanent magnet motors that are being developed. Research efforts and technological advances made by others in the superconductor field or in other areas with applications to the power quality and reliability markets may render our development efforts obsolete. Many of our competitors have substantially greater financial resources, research and development, manufacturing and marketing capabilities than we have. In addition, as the HTS wire, HTS electric motors and generators, and power electronic systems markets develop, other large industrial companies may enter those fields and compete with us. If we are unable to compete successfully, it may harm our business, which in turn may limit our ability to acquire or retain customers.

Third parties have or may acquire patents that cover the high temperature superconductor materials we use or may use in the future to manufacture our products, and our success depends on our ability to license such patents or other proprietary rights.

We expect that some or all of the HTS materials and technologies we use in designing and manufacturing our products are or will become covered by patents issued to other parties, including our competitors. If that is the case, we will need either to acquire licenses to these patents or to successfully contest the validity of these patents. The owners of these patents may refuse to grant licenses to us, or may be willing to do so only on terms that we find commercially unreasonable. If we are unable to obtain these licenses, we may have to contest the validity or scope of those patents to avoid infringement claims by the owners of these patents. It is possible that we will not be successful in contesting the validity or scope of a patent, or that we will not prevail in a patent infringement claim brought against us. Even if we are successful in such a proceeding, we could incur substantial costs and diversion of management resources in prosecuting or defending such a proceeding.

Our patents may not provide meaningful protection for our technology, which could result in us losing some or all of our market position.

We own or have licensing rights under many patents and pending patent applications. However, the patents that we own or license may not provide us with meaningful protection of our technologies and may not prevent our competitors from using similar technologies, for a variety of reasons, such as:

- the patent applications that we or our licensors file may not result in patents being issued;
- any patents issued may be challenged by third parties; and
- others may independently develop similar technologies not protected by our patents or design around the patented aspects of any technologies we develop.

Moreover, we could incur substantial litigation costs in defending the validity of our own patents. We also rely on trade secrets and proprietary know-how to protect our intellectual property. However, our non-disclosure agreements and other safeguards may not provide meaningful protection for our trade secrets and other proprietary information. If the patents that we own or license or our trade secrets and proprietary know-how fail to protect our technologies, our market position may be adversely affected.

Our success is dependent upon attracting and retaining qualified personnel, and our inability to do so could significantly damage our business and prospects.

Our success will depend in large part upon our ability to attract and retain highly qualified research and development, management, manufacturing, marketing and sales personnel. Hiring those persons may be especially difficult due to the specialized nature of our business.

We are particularly dependent upon the services of Dr. Gregory J. Yurek, our co-founder and our Chairman of the Board, President and Chief Executive Officer, and Dr. Alexis P. Malozemoff, our Chief Technical Officer. The loss of the services of either of those individuals could significantly damage our business and prospects.

Our contracts with the U.S. government are subject to audit, modification or termination by the U.S. government, and the continued funding of such contracts remains subject to annual congressional appropriation, which if not approved could adversely affect our results of operations and financial condition.

As a company which contracts with the U.S. government, we are subject to financial audits and other reviews by the U.S. government of our costs and performance, accounting and general business practices relating to these contracts. Based on the results of its audits, the U.S. government may adjust our contract-related costs and fees. No assurances can be given that adjustments arising from government audits and reviews would not have a material adverse effect on our results of operations.

All of our U.S. government contracts can be terminated by the U.S. government for its convenience. Termination for convenience provisions provide only for our recovery of costs incurred or committed, settlement expenses and profit on work completed prior to termination. In addition to the right of the U.S. government to terminate its contract with us, U.S. government contracts are conditioned upon the continuing approval by Congress of the necessary spending to honor such contracts. Congress usually appropriates funds for a given program on a fiscal-year basis even though contract performance may take more than one year. Consequently, at the beginning of a major governmental program, the contract is usually not fully funded, and additional monies are normally committed to the contract only if, as and when appropriations are made by Congress for future fiscal years. There can be no assurance that our U.S. government contracts will not be terminated or suspended in the future. The U.S. government's termination of, or failure to fully fund, one or more of our contracts would have a negative impact on our operating results and financial condition. Further, in the event that any of our government contracts are terminated for cause, it could significantly affect our ability to obtain future government contracts which could, in turn, seriously harm our ability to develop our technologies and products.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

Our exposure to market risk through financial instruments, such as investments in marketable securities, is not material.

Item 4. Controls and Procedures

The Company's management, with the participation of the Company's chief executive officer and chief financial officer, evaluated the effectiveness of the Company's disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Exchange Act) as of December 31, 2003. In designing and evaluating the Company's disclosure controls and procedures, management recognized that any controls and procedures, no matter how well designed and operated, can provide only reasonable assurance of achieving their objectives and management necessarily applied its judgment in evaluating the cost-benefit relationship of possible controls and procedures. Based on this evaluation, the Company's chief executive officer and chief financial officer concluded that, as of December 31, 2003, the Company's disclosure controls and procedures were (1) designed to ensure that material information relating to the Company, including its consolidated subsidiaries, is made known to the Company's chief executive officer and chief financial officer by others within those entities, particularly during the period in which this report was being prepared and (2) effective, in that they provide reasonable assurance that information required to be disclosed by the Company in the reports that it files or submits under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms.

No change in the Company's internal control over financial reporting (as defined in Rules 13a-15(f) and 15d-15(f) under the Exchange Act) occurred during the fiscal quarter ended December 31, 2003 that has materially affected, or is reasonably likely to materially affect, the Company's internal control over financial reporting.

PART II
OTHER INFORMATION

Item 1. Legal Proceedings

We received notice on November 5, 2003 of a lawsuit filed against us on October 28, 2003 in the Court of Chancery of the State of Delaware in and for New Castle County by TM Capital Corp., a past financial advisor to us, under which TM Capital claims to be entitled to cash and equity compensation with respect to our October 2003 public equity offering. Specifically, TM Capital is requesting a cash payment in excess of \$1.6 million and warrants to purchase over 170,000 shares of our common stock at an exercise price of \$9.50 per share as a result of our decision not to continue to pursue a proposed \$50 million secured debt transaction and instead complete a public stock offering. We filed an answer to this lawsuit, denying TM Capital's claims for damages and other relief and asserting several counterclaims against TM Capital, including breach of contract, gross negligence, and breach of fiduciary duty. The lawsuit is currently in the early stages of discovery. We believe we have meritorious defenses to this lawsuit and intend to defend it vigorously.

Item 2. Changes in Securities and Use of Proceeds

Not Applicable

Item 3. Defaults Upon Senior Securities

Not Applicable

Item 4. Submission of Matters to a Vote of Security Holders

| Proposal | Votes For | Votes Withheld | | |

| 3. Ratification of independent auditors: | 18,927,711 | 114,055 | 29,494 | None |

Please see the Company's Proxy Statement filed with the SEC on September 8, 2003 in connection with this Annual Meeting held on October 1, 2003 for a description of the matters voted upon.

Also, please note that, as disclosed in the Company's Form 10-Q filed on November 14, 2003, Mr. Gérard Menjon, chairman of EDF Capital Investissement, resigned as a member of the Company's Board of Directors on October 30, 2003. Mr. Menjon's resignation was not as a result of any disagreement with the Company.

Item 5. Other Information

Not Applicable

Item 6. Exhibits and Reports on Form 8-K

a) Exhibits

See the Exhibit Index on the page immediately preceding the exhibits for a list of exhibits filed as part of this quarterly report, which Exhibit Index is incorporated herein by this reference.

b) Reports on Form 8-K

On November 6, 2003, we furnished a Current Report on Form 8-K, dated November 6, 2003, to report under Item 12 the information required with respect to financial results for the quarter ended September 30, 2003.

SIGNATURES

Pursuant to the requirements of the Securities Exchange Act of 1934, the registrant has duly caused this report to be signed on its behalf by the undersigned thereunto duly authorized.

| 31.1 | Chief Executive Officer - Certification pursuant to Rule 13a-14(a) or Rule 15d-14(a) of the Securities Exchange Act of 1934, as adopted pursuant to Section 302 of the Sarbanes-Oxley Act of 2002. |
| 31.2 | Chief Financial Officer - Certification pursuant to Rule 13a-14(a) or Rule 15d-14(a) of the Securities Exchange Act of 1934, as adopted pursuant to Section 302 of the Sarbanes-Oxley Act of 2002. |
| 32.1 | Chief Executive Officer - Certification pursuant to Rule 13a-14(b) or Rule 15d-14(b) of the Securities Exchange Act of 1934 and 18 U.S.C. Section 1350, as adopted pursuant to Section 906 of the Sarbanes-Oxley Act of 2002. |
| 32.2 | Chief Financial Officer - Certification pursuant to Rule 13a-14(b) or Rule 15d-14(b) of the Securities Exchange Act of 1934 and 18 U.S.C. Section 1350, as adopted pursuant to Section 906 of the Sarbanes-Oxley Act of 2002. |

CERTIFICATIONS

I, Gregory J. Yurek, certify that:

1. I have reviewed this Quarterly Report on Form 10-Q of American Superconductor Corporation;
2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) for the registrant and have:
 - a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
 - b) [Paragraph omitted in accordance with SEC transition instructions contained in SEC Release 34-47986];
 - c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
 - d) Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):
 - a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
 - b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

CERTIFICATIONS

I, Kevin M. Bisson, certify that:

1. I have reviewed this Quarterly Report on Form 10-Q of American Superconductor Corporation;
2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) for the registrant and have:
 - a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
 - b) [Paragraph omitted in accordance with SEC transition instructions contained in SEC Release 34-47986];
 - c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
 - d) Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):
 - a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
 - b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.
