Check the appropriate box to indicate the rule pursuant to which this form is being filed and provide the period to which the information in this form applies:

Rule 13p-1 under the Securities Exchange Act (17 CFR 240.13p-1) for the reporting period from January 1 to December 31, 2015.

Under the final rule, a company that uses any of the designated minerals is required to conduct a reasonable 'country of origin' inquiry that must be performed in good faith and be reasonably designed to determine whether any of its minerals originated in the covered countries or are from scrap or recycled sources.

Section 1 – Conflict Minerals Disclosure

ITEM 1.01 – Conflicts Minerals Disclosure and Report

Conflict Minerals Disclosure

A copy of The Company’s Conflict Minerals Report is provided as Exhibit 1.01 hereto and is publicly available at <http://ir.amsc.com/governance.cfm>

ITEM 1.02 – Exhibit

Exhibit 1.01 – Conflict Minerals Report is attached per Section 1.

Section 2 – Exhibits

Item 2.01 Exhibits

Exhibit 1.01 – Conflict Minerals Report as required by Item 1.01 and 1.02 of this Form.

SIGNATURES

Pursuant to the requirements of the Securities Exchange Act of 1934, the registrant has duly caused this report to be signed on its behalf by the duly authorized undersigned.

American Superconductor Corporation

Exhibit 1.01 to Form SD

AMSC CONFLICT MINERALS REPORT

OVERVIEW

This AMSC Conflict Minerals Report (“Report”) has been prepared pursuant to Rule 13p-1 (the “Rule”) under the Securities Exchange Act of 1934, as amended, for the reporting period from January 1 to December 31, 2015.

This Report relates to the process undertaken for AMSC products that were manufactured during calendar year 2015 and that contain or are believed to contain tin, tantalum, tungsten or gold (“3TG”). This Report includes a discussion of our conflict minerals program, reasonable country of origin investigation (RCOI), due diligence procedures performed, and the disclosures required by the Securities and Exchange Commission (“SEC”). AMSC is required to file this Report with the SEC’s because based on our reasonable country of origin and further due diligence, we were not able to determine that 3TG used in our products did not originate in the Democratic Republic of Congo (“DRC”) or certain countries that share an internationally-recognized border with the DRC (each, an “adjoining country”). Covered countries are defined by Section 1502 of the SEC’s Dodd-Frank Wall Street Reform and Consumer Protection Act (“Act”). The Act was signed into law on July 21, 2010. Covered countries include the Democratic Republic of the Congo, Angola, Burundi, Central African, Tanzania, Uganda, and Zambia.

Based on its assessment of survey responses received from suppliers, AMSC determined that the majority of the materials used in the production of its products do not contain 3TG sourced from the DRC or from an adjoining country. However, from our RCOI we could not determine that the remainder of 3TG used in the production of our products did not originate from the DRC or from an adjoining country. The Company’s overall determination is a result of effort through March 31, 2016. Our overall effort, which commenced in 2013, continues as fully described below.

DESIGN OF CONFLICT MINERALS PROGRAM

AMSC undertook due diligence on the source and chain of custody of the 3TG in accordance with the OECD Due Diligence Guidance for Responsible Supply Chains of Minerals from Conflict-Affected and High Risk Areas (Second Edition) (including the supplements on Gold and on Tin, Tungsten and Tantalum) (“OECD Framework”) being adopted, and described below

The Company has disclosed the information above, along with a copy of this Report, on its website, <http://ir.amsc.com/governance.cfm>.

www.amsc.com

RCOI and DUE DILIGENCE PERFORMED

Phase one of our conflict minerals compliance program included a comprehensive screening of our product families. The product families include Grid products and Wind products, which also represent our reporting segments. Our Grid products include D-VAR® Systems and Superconductor Wire and associated applications. Our Wind products include Electrical Control Systems. Descriptions of each product can be found under “Product Descriptions”.

Phase two of our conflict minerals compliance program included AMSC engineers’ conducting a detailed bill of material review to ascertain if any of our components contain, or are believed to contain, 3TG.

All purchased parts or components that are believed or may contain 3TG minerals via engineering review are confirmed by our suppliers to be absent of minerals described as 3TG conflict minerals. This screening was requested of all of our 128 major suppliers globally.

AMSC uses the Conflict Minerals Reporting Template developed by the Conflict Free Sourcing Initiative (“CFSI”), and initiative of the Electronic Industry Citizenship Coalition (“EICC”), a US-based electronics manufacturing trade association.

Suppliers of purchased parts or components that are believed to contain 3TG via engineering review and survey are required by the supply chain to disclose the source of origin using the EICC template detailing the unique smelter ID number of every source of material procured. (Disclosure requests are first primarily requested of suppliers based on delivery quantities from the supplier in addition to the period deliveries were received. Current products manufactured in the last year and related deliveries are prioritized based on quantities used in production and the likelihood suppliers are available to respond.)

Disclosures from our suppliers that are received are reviewed for completeness, consistency and accuracy based on known smelter capabilities and locations. This is performed by our supply chain teams assigned to each of the described product families. Efforts to obtain non responding disclosures are typically made through second requests and follow up calls.

Responses received from suppliers in North America continue to be generally more complete and often indicate that they are conflict free than those from other parts of the world. Due to the unpredictability of response rates and the completeness of the responses, the Company continues to update its due diligence process to assure the highest response rate reasonably possible. A significant portion of our supply chain is not required to file reports with the SEC under Sections 13(a) or 14(b) of the Securities Exchange Act of 1934, and is therefore not concerned by reporting obligations pursuant to Rule 13p-1.

AMSC
64 Jackson Road | Devens MA 01434 | +1 (978) 842-3000
www.amsc.com

Of the 128 originally surveyed suppliers for our combined product mix, 63 have confirmed that the 3TG used in the products that we purchase from them were not sourced from the DRC or from a covered country. Thirty nine suppliers indicate that the products they provide to us contain 3TG, of which based on due diligence we have not been able to determine whether such 3TG may have been sourced from the DRC or from an adjoining country. Most of the 39 suppliers are working to determine the sources of origin within their supply chains are greater than 50% complete in their efforts. Twenty six have not provided any initial data to make any determination and due diligence continues to be performed on them as well.

AMSC has taken significant steps to improve the due diligence process and is committed to continuous process improvement and taking additional steps to mitigate the risk that its necessary conflict minerals benefit armed groups. These steps include implementing a:

- Continuous internal oversight and review process of responses;
- Continuous risk based evaluation of bills of material to confirm suspect materials;
- Risk based selection of suppliers providing suspect materials for current products;
- Process for requesting declarations and after a reasonable period with no response, second requests;
- Detailed inspection of responses and following up on inconsistencies, missing information, or possible inaccuracies of information; and
- For suppliers not responding to second requests, phone call follow-up and escalation to the VP Global Manufacturing, Supply Chain Management & Information Technology is mandatory.

Non responding suppliers face discontinuation of their supply service to AMSC. The Company will keep improving its due diligence measures by working more closely with suppliers to help them understand and satisfy AMSC's requirements fully.

Both Phase one and Phase two have not significantly changed from prior years.

PRODUCT DESCRIPTIONS

Our Grid products include:

- *D-VAR® Systems*. D-VAR® systems can provide the reactive power needed to stabilize voltage on the grid. These systems also can be used to enable connection of renewable sources of power to the power grid, increase grid reliability for utilities and protect certain industrial facilities against voltage swells and sags which could be disruptive to their businesses.
- *Superconductor Wire and Applications*. Using a compound of yttrium barium copper oxide ("YBCO"), we manufacture and provide superconductor wire that can conduct many times more electricity than conventional conductors with minimal power loss. This wire can be incorporated into a variety of applications that we market, including: Resilient Electric Grid systems, Standalone Fault Current Limiters, and Ship Protection Systems for the U.S. Navy.

AMSC
64 Jackson Road | Devens MA 01434 | +1 (978) 842-3000
www.amsc.com

Our Wind products include:

- *Electrical Control Systems.* Our electrical control systems regulate voltage, control power flows and maximize wind turbine efficiency, among other functions. Our electrical control systems contain our PowerModule™ power electronic converters, which incorporate power semiconductor devices that switch, control and move large amounts of power faster and with far less disruption than the electromechanical switches historically used.

DEFINITIONS

CONFLICT MINERALS

The term conflict minerals means:

- (i) Columbite-tantalite (coltan), cassiterite, gold, wolframite, or their derivatives which are limited to tantalum, tin, and tungsten, unless the Secretary of State determines that additional derivatives are financing conflict in the Democratic Republic of the Congo or an adjoining country; or
- (ii) Any other mineral or its derivatives determined by the Secretary of State to be financing conflict in the Democratic Republic of the Congo or an adjoining country.

DRC CONFLICT FREE

The term DRC conflict free means that the product does not contain conflict minerals necessary to the functionality or production of that product that directly or indirectly finance or benefit armed groups in the Democratic Republic of the Congo or an adjoining country. Conflict minerals that a registrant obtains from recycled or scrap sources are considered DRC conflict free.

The term armed group means an armed group that is identified as a perpetrator of serious human rights abuses in annual Country Reports on Human Rights Practices under sections 116(d) and 502B(b) of the Foreign Assistance Act of 1961 (22 U.S.C. 2151n(d) and 2304(b)) relating to the Democratic Republic of the Congo or an adjoining country.

The table below lists the country location of the smelter or refiner used by our suppliers which, to the extent known, processes the necessary 3TG in all of our products.
