AMSC Announces Improved Third Quarter Financial Outlook

- Revenues now expected to be in the range of \$22 million to \$24 million
- Company expects to approach neutral cash flows in the third fiscal quarter

DEVENS, Mass., Dec. 09, 2015 (GLOBE NEWSWIRE) -- AMSC (NASDAQ:AMSC), a global solutions provider serving wind and power grid industry leaders, today announced updated financial guidance for its third fiscal quarter ending December 31, 2015. The company now expects its revenues to be in the range of \$22 million to \$24 million for the third quarter of fiscal 2015, which is higher than its previous guidance of \$19 million to \$22 million. The improved outlook on third quarter revenues is driven primarily by higher than anticipated revenues in the company's Wind segment. As a result of the higher than anticipated revenues, the company now expects its net loss to be less than \$4.5 million, or \$0.33 per share, compared to its previous forecast of less than \$5.5 million or \$0.40 per share. The company's non-GAAP net loss is now expected to be less than \$7.5 million or \$0.54 per share, compared to its previous forecast of less than \$8.5 million or \$0.62 per share. Please refer to the financial table below for a reconciliation of GAAP to non-GAAP forecasted results.

"We now believe revenues in our Wind segment will be higher than we previously expected," said Daniel P. McGahn, President and CEO, AMSC. "As a result of these higher than anticipated revenues and improved collections, we now expect our cash flows in the third fiscal quarter to be roughly neutral, resulting in an expected ending balance of cash, cash equivalents and restricted cash at the end of the third fiscal quarter to be roughly equivalent to the balance at the end of the second fiscal quarter."

[About AMSC \(NASDAQ: AMSC\)](#)

AMSC generates the ideas, technologies and solutions that meet the world's demand for smarter, cleaner ... better energy. Through its Windtec™ Solutions, AMSC provides wind turbine electronic controls and systems, designs and engineering services that reduce the cost of wind energy. Through its Gridtec™ Solutions, AMSC provides the engineering planning services and advanced grid systems that optimize network reliability, efficiency and performance. The company's solutions are now powering gigawatts of renewable energy globally and enhancing the performance and reliability of power networks in more than a dozen countries. Founded in 1987, AMSC is headquartered near Boston, Massachusetts with operations in Asia, Australia, Europe and North America. For more information, please visit www.amsc.com.

[Forward-Looking Statements](#)

This press release contains forward-looking statements within the meaning of Section 21E of the Securities Exchange Act of 1934, as amended (the "Exchange Act"). Any statements in this release about future expectations, plans and prospects for the company, including, without limitation, our expectation regarding future financial results, our expectation that our cash flows in the third fiscal quarter will be roughly neutral, and our expectation that our balance of cash, cash equivalents and restricted cash at the end of the third fiscal quarter of 2015 will be roughly equivalent compared to the end of the second fiscal quarter of 2015, and other statements containing the words "believes," "anticipates," "plans," "expects," "will" and similar expressions, constitute forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. Such forward-looking statements represent management's current expectations and are inherently uncertain. There are a number of important factors that could materially impact the value of our common stock or cause actual results to differ materially from those indicated by such forward-looking statements. Such factors include: We have a history of operating losses, which may continue in the future. Our operating results may fluctuate significantly from quarter to quarter and may fall below expectations in any particular fiscal quarter; we have a history of negative operating cash flows, and we may require additional financing in the future, which may not be available to us; Our Term Loans include certain covenants and other events of default. Should we not comply with these covenants or incur an event of default, we may be required to repay our obligation in cash, which could have an adverse effect on our liquidity; We may be required to issue performance bonds or provide letters of credit, which restricts our ability to access any cash used as collateral for the bonds or letters of credit; Changes in exchange rates could adversely affect our results from operations; If we fail to maintain proper and effective internal controls over financial reporting, our ability to produce accurate and timely financial statements could be

impaired and may lead investors and other users to lose confidence in our financial data; Our financial condition may have an adverse effect on our customer and supplier relationships; Our success in addressing the wind energy market is dependent on the manufacturers that license our designs; A significant portion of our revenues are derived from a single customer, Our success is dependent upon attracting and retaining qualified personnel and our inability to do so could significantly damage our business and prospects; We may not realize all of the sales expected from our backlog of orders and contracts; Our business and operations would be adversely impacted in the event of a failure or security breach of our information technology infrastructure; We may not be able to ramp up production at our new manufacturing facility in Romania, and, if we are able to do so, we may have manufacturing quality issues, which would negatively affect our revenues and financial position; We rely upon third-party suppliers for the components and subassemblies of many of our Wind and Grid products, making us vulnerable to supply shortages and price fluctuations, which could harm our business; Many of our revenue opportunities are dependent upon subcontractors and other business collaborators; If we fail to implement our business strategy successfully, our financial performance could be harmed; Problems with product quality or product performance may cause us to incur warranty expenses and may damage our market reputation and prevent us from achieving increased sales and market share; Regulations related to conflict-free minerals may force us to incur significant additional expenses; Our contracts with the U.S. government are subject to audit, modification or termination by the U.S. government and include certain other provisions in favor of the government. The continued funding of such contracts remains subject to annual congressional appropriation which, if not approved, could reduce our revenue and lower or eliminate our profit; Many of our customers outside of the United States, particularly in China, are, either directly or indirectly, related to governmental entities, and we could be adversely affected by violations of the United States Foreign Corrupt Practices Act and similar worldwide anti-bribery laws outside the United States; We have limited experience in marketing and selling our superconductor products and system-level solutions, and our failure to effectively market and sell our products and solutions could lower our revenue and cash flow; We may acquire additional complementary businesses or technologies, which may require us to incur substantial costs for which we may never realize the anticipated benefits; Our success depends upon the commercial use of high temperature superconductor (HTS) products, which is currently limited, and a widespread commercial market for our products may not develop; Growth of the wind energy market depends largely on the availability and size of government subsidies and economic incentives; We have operations in and depend on sales in emerging markets, including India and China, and global conditions could negatively affect our operating results or limit our ability to expand our operations outside of these countries. Changes in India's or China's political, social, regulatory and economic environment may affect our financial performance; Our products face intense competition, which could limit our ability to acquire or retain customers; Our international operations are subject to risks that we do not face in the United States, which could have an adverse effect on our operating results; Adverse changes in domestic and global economic conditions could adversely affect our operating results; We may be unable to adequately prevent disclosure of trade secrets and other proprietary information; Our patents may not provide meaningful protection for our technology, which could result in us losing some or all of our market position; There are a number of technological challenges that must be successfully addressed before our superconductor products can gain widespread commercial acceptance, and our inability to address such technological challenges could adversely affect our ability to acquire customers for our products; Third parties have or may acquire patents that cover the materials, processes and technologies we use or may use in the future to manufacture our Amperium products, and our success depends on our ability to license such patents or other proprietary rights; Our technology and products could infringe intellectual property rights of others, which may require costly litigation and, if we are not successful, could cause us to pay substantial damages and disrupt our business; We have filed a demand for arbitration and other lawsuits against our former largest customer, Sinovel, regarding amounts we contend are overdue. We cannot be certain as to the outcome of these proceedings; We have been named as a party in various legal proceedings, and we may be named in additional litigation, all of which will require significant management time and attention, result in significant legal expenses and may result in an unfavorable outcome, which could have a material adverse effect on our business, operating results and financial condition; and Our common stock has experienced, and may continue to experience, significant market price and volume fluctuations, which may prevent our stockholders from selling our common stock at a profit and could lead to costly litigation against us that could divert our management's attention.

These and the important factors discussed under the caption "Risk Factors" in Part 1. Item 1A of our Form 10-K for the fiscal year ended March 31, 2015, and our other reports filed with the SEC, among others, could cause actual results to differ materially from those indicated by forward-looking statements made herein and presented elsewhere by management from time to time. Any such forward-looking statements represent management's estimates as of the date of this press release. While we may elect to update such forward-looking statements at some point in the future, we disclaim any obligation to do so, even if subsequent events cause our views to change. These forward-looking statements should not be relied upon as representing our views as of any date subsequent to the date of this press release.

Reconciliation of Forecast GAAP Net Loss to Non-GAAP Net Loss
(In millions, except per share data)

	Three months ending Dec. 31, 2015	
Net loss	\$	(4.5)
Stock-based compensation		0.6

Gain on sale of investment in Blade Dynamics		(2.4)
Non-cash interest expense		0.1
Consumption of zero-cost inventory		(1.3)
Non-GAAP net loss	\$	(7.5)
Non-GAAP net loss per share	\$	(0.54)
Shares outstanding		13.8

Note: Non-GAAP net loss is defined by the Company as net loss before stock-based compensation; amortization of acquisition-related intangibles; restructuring and impairment charges; consumption of zero cost-basis inventory; gain on sale of investment in Blade Dynamics; non-cash interest expense; change in fair value of derivatives and warrants; and other unusual charges, net of any tax effects related to these items. The Company believes non-GAAP net loss assists management and investors in comparing the Company's performance across reporting periods on a consistent basis by excluding these non-cash, non-recurring or other charges that it does not believe are indicative of its core operating performance. The Company also regards non-GAAP net loss as a useful measure of operating performance to complement operating loss, net loss and other GAAP financial performance measures. In addition, the Company uses non-GAAP net loss as a factor in evaluating management's performance when determining incentive compensation and to evaluate the effectiveness of its business strategies.

Generally, a non-GAAP financial measure is a numerical measure of a company's performance, financial position or cash flow that either excludes or includes amounts that are not normally excluded or included in the most directly comparable measure calculated and presented in accordance with GAAP. The non-GAAP measures included in this release, however, should be considered in addition to, and not as a substitute for or superior to, operating income, cash flows, or other measures of financial performance prepared in accordance with GAAP. A reconciliation of non-GAAP to GAAP net loss is set forth in the table above.
