

AMSC to Present at Upcoming Investor Conferences

Presentations to be Broadcast Live Over the Internet on September 4 and September 10

DEVENS, Mass.--(BUSINESS WIRE)--Aug. 26, 2008--American Superconductor Corporation (NASDAQ: AMSC), a leading energy technologies company, today announced that the company will be participating at the following investor conferences:

- On September 4, 2008 at 9:30 a.m. ET, AMSC Senior Vice President and Chief Financial Officer David Henry will be presenting at the Kaufman Brothers 11th Annual Investor Conference in New York City.
- On September 10, 2008 at 10:30 a.m. ET, AMSC founder and Chief Executive Officer Greg Yurek will be presenting at the Cowen and Company Second Annual Clean Energy Conference in New York City.

Both of these presentations will include a discussion of the company's recent financial results, business strategy and outlook. Those interested in listening to the live or archived broadcasts via the Internet should log on to the "Investors" section of AMSC's website, www.amsc.com/investors.

About American Superconductor (NASDAQ: AMSC)

AMSC is a leading energy technologies company offering an array of solutions based on two proprietary technologies: programmable power electronic converters and high temperature superconductor (HTS) wires. The company's products, services and system-level solutions enable cleaner, more efficient and more reliable generation, delivery and use of electric power. AMSC is a leader in alternative energy, offering grid interconnection solutions as well as licensed wind turbine designs and electrical systems. As the world's principal supplier of HTS wire, the company is enabling a new generation of compact, high-power electrical products, including power cables, grid-level surge protectors, Secure Super Grids™ technology, motors, generators, and advanced transportation and defense systems. AMSC also provides utility and industrial customers worldwide with voltage regulation systems that dramatically enhance power grid capacity, reliability and security, as well as industrial productivity. The company's technologies are protected by a broad and deep intellectual property portfolio consisting of hundreds of patents and licenses worldwide. More information is available at www.amsc.com.
